### DESCRIPTION AND PURPOSE OF ITEM

This item indicates the construction plan station of selected points along a highway.

This information is used to develop an identifiable connection between major features along a highway with those same features on the construction plans. These highway features may include major intersections, bridges, termini points of construction sections, and Key Route beginning and ending points.

This item can be obtained from the most current construction plans and reflects the stationing of the plans for the most recent section coded in Construction Section (Item 94B). In some instances, if plans are unavailable, the stationing may be obtained from the field where plan stations have been stamped in the pavement. If in question, contact the district Bureau of Project Implementation.

### CODE AND SCREEN ENTRY INSTRUCTIONS

An 8-digit numeric code.

Code the plan station as an 8-digit value, recording zeros as needed to position the implied sign and decimal.

Note: When entering a Construction Plan Station for the first time, enter the plus sign (+) and the decimal point. When changing an Existing Plan Station (i.e., adding, changing or deleting), it is not necessary to code the plus sign (+) nor the decimal point.

Leave blank if not applicable.

	<u>Example</u>	<u>Plan Station</u>
New Plan Station:	0124 + 15.20 1234 + 01.61 (Blank)	124 + 15.2 1234 + 1.61 Not Applicable
Change Existing Plan Station:	1580    1462 0120    0040	1456 + 12.32 0120 + 00.40
